Company Overview:

SSP Innovations which incorporated in 2003 is both an authorized Esri Silver and premier Schneider Electric Implementation business partner specializing in the development of web and client server software as well as spatially-enabled solutions. We primarily utilize Microsoft's latest development technologies and most often deploy our solutions with Microsoft .Net, SQL Server, and Oracle software.

Today our staff includes some of the most sought after technical talent that exists in the GIS arena. And, our current GIS work is centered on the energy & utilities vertical including work with major utilities across the United States.

Brief Description:

The GIS software consultant role will focus on gathering requirements and developing custom solutions utilizing Microsoft C#.net, Microsoft SQL Server and/or Oracle technology for SSP's electric, gas, water, and fiber customers. The development will focus on GIS mapping solutions utilizing both client server and web development methodologies. The ideal candidate will be a self-starter and a quick learner who can thrive in a fast paced, dynamic environment.

Job Duties/Requirements:

The successful candidate will possess the following:

- Experience and/or desire to work with Esri GIS software
- Experience in Microsoft C#.Net
- Experience with relational database management systems (SQL Server, Oracle, Access)
- Strong grasp of structured programming language concepts
- Ability to work in a fast paced environment

Skills and Knowledge:

- Proficient Communicator - written & oral
- Code development experience with Microsoft C#.net or VB.Net
- Understanding of Object Oriented Design Concepts
- Experience developing client server and/or web solutions
- Understanding of Relational Database Design
- Experience with Databases - SQL Server, Oracle, Access, or similar

Education/Experience:

- Bachelor's degree in Computer Science, GIS, or a related field
- Or, one (1) or more years of related and equivalent experience

This is a fulltime position with benefits and bonus program based in Englewood, CO.
